

# Perfume Training

## Self Study Perfume Training

Perfume training at this level is excellent for anyone with responsibility or interest in fragrance. It is ideal for study anytime & anywhere. There are no pre-requisites for study except an enthusiasm to learn!

### Perfume Course Benefits:

- Builds fragrance knowledge, skills & confidence
- Excellent information for fragrance related careers
- Unravels such areas as fragrance preference & language
- Solid base for future self-learning
- Fascinating experience

*The Perfume Course is based on written and illustrated content, supported by samples to smell. The course is accompanied by 20 vials of perfumery samples and smelling blotters, representing the concepts covered. These samples are usually only available to industry insiders.*

*Learning in this way is extremely useful and also fun! Starting from first principals, students quickly gain an understanding of many complex concepts.*

*The course has been designed by Penny Williams, a fully qualified and enthusiastic Perfumer with 20 years experience as a Perfumer and Trainer. Penny is available during the course to help participants get the most out of the study.*

## How We Smell

Fundamentally we don't all perceive the same smell in the same way. This is not just our interpretation; our noses actually behave differently. This and many other fundamental concepts are explored in the course content and endorsed using the sample materials.

# Perfume Training

## Ingredients of Perfumery

Gain an appreciation of ingredients used in fragrances, how they are obtained and processed.

The samples provided contain some key ingredients, usually only available to industry insiders.

Raw ingredients: Benzoin, olibanum, vanilla & tonka

## The Perfumer & Fragrance Design

A Perfumer knows the odour and behaviour of around 1500 different perfume ingredients. How do they begin to put them together!? Find out how fragrances are designed and explore an example fragrance project.

## Other Topics

- Fragrance structure and evaluation
- History of Fragrances
- Fragrance Categories & Uses
- Smelling Techniques
- Fragrance Safety & Legislation
- Benefits of Fragrance

Sample Evaluation

## Fragrance Language & Categories

Explore fragrance materials and the world around you to unravel the often foreign language of fragrance. Examples include aldehydic, green, chypre and fougere.

## Further Information

### How long does it take to complete the course?

As a guide, expect to spend 5-10 hours directly studying & smelling.

You can study at a pace which suits you and take as long as you need to get the most from the course.

When and where you study is flexible. Somewhere comfortable and fairly odour free is our recommendation.

### How long before the course is received?

A PDF file with course content will be sent to you by email, once payment has been processed.

The content is such that you can start straight away.

Samples are dispatched within 24 hours, are sent on a Royal Mail signed for service. They arrive between 2-8 days later, depending on your location.

### Is additional support available if I need extra help?

Yes, it is. If you have any questions during your studies, please just contact us for help.

### What About the Test?

**The test is completely optional. The benefits of doing it are to give yourself a check that you have understood the content well and to be awarded a Perfume Training Certificate. This achievement is something you can be proud of !**

### How do I sign up?

Just visit the website and use the Buy Now function from the Self Study Perfume Training page.

Please contact us for further information.
